

Smart City Urban Infrastructure Planning & Analytics Report

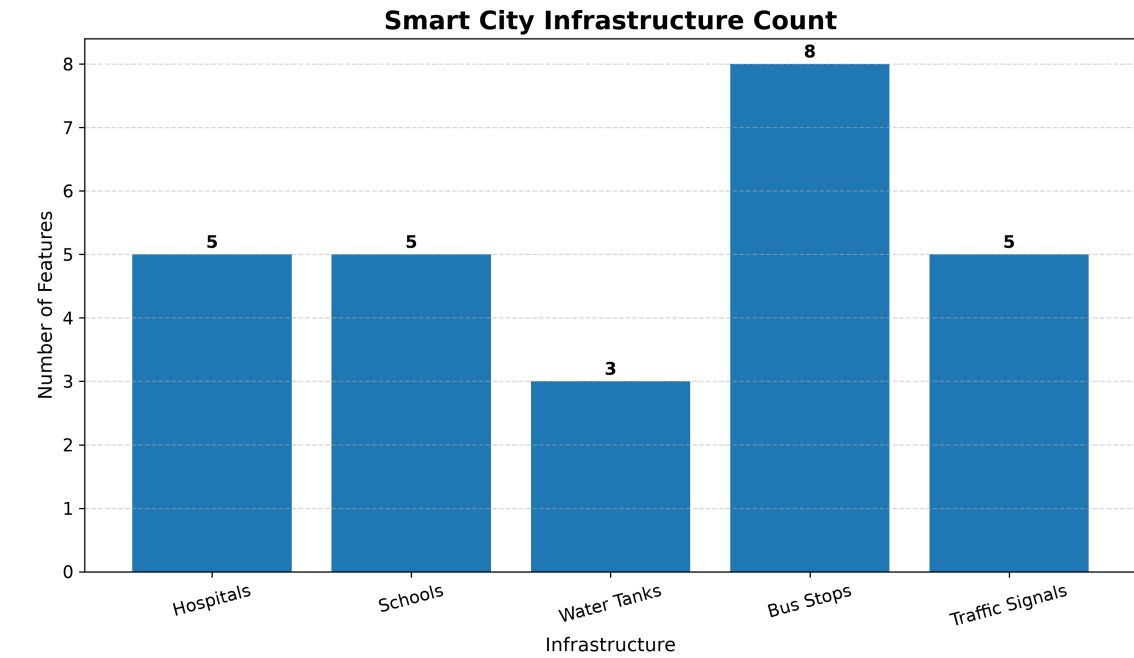

Project Overview

This report summarizes the urban infrastructure available in the Smart City GIS Project. The analysis was performed using QGIS, Python, Pandas and Matplotlib.

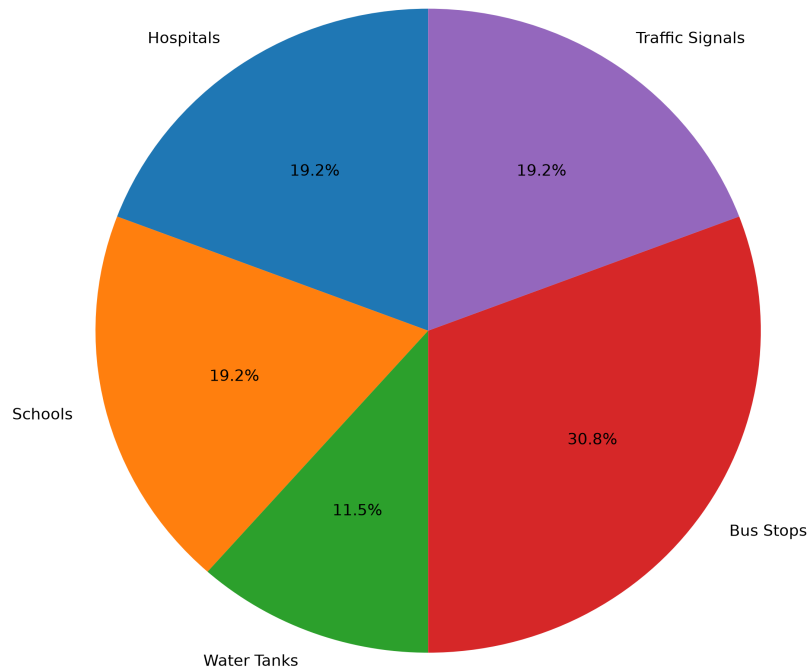

Infrastructure Summary

Infrastructure	Count
Hospitals	5
Schools	5
Water Tanks	3
Bus Stops	8
Traffic Signals	5

Infrastructure Charts

Infrastructure Distribution

Key Findings

- Total mapped infrastructure assets: **26**
- Highest available infrastructure: **Bus Stops** (8)
- Lowest available infrastructure: **Water Tanks** (3)
- This analysis demonstrates the integration of GIS, Python, Excel and Data Analytics for smart city planning.
